

TetriDyn Solutions Offers Additional Electronic Medical Record Options for Area Physicians

Pocatello, ID July 21, 2009 – TetriDyn Solutions, Inc. would like to issue a **Correction** to the **July 15, 2009 Press Release *TetriDyn Solutions Offers Additional Electronic Medical Record Option for Area Physicians***. The prior release incorrectly stated that Paragon, a McKesson Corporation product, has a CCHIT Certified® Electronic Health Record (EHR) product. Paragon is a hospital information system rated as the #1 community HIS by KLAS. Additionally, Practice Partner is the proper name of the CCHIT-recognized product.

Information technology firm TetriDyn Solutions, Inc. is certified through McKesson Corporation to be the only full service Value Added Reseller (VAR) of Practice Partner Software in the region. TetriDyn is certified to resell, implement, and offer training and support for Practice Partner.

Practice Partner offers medical professionals electronic software tools for the tracking of patient data and clinical notation. Practice Partner is a registered trademark of McKesson Corporation. The system works well with hospital information solution Paragon, also a McKesson product, to provide a more complete patient record accessible from office or hospital.

Practice Partner Version 9.3 is a CCHIT Certified 08 Ambulatory EHR, an electronic health record system that meets the criteria for office-based use established by the Certification Commission for Health Information Technology (CCHIT). “Offering this solution to our customers will provide a significant advantage for those medical offices that are pushing for ‘meaningful use’ that is outlined in the government stimulus package for doctors. This system will allow offices to work with hospitals that also use McKesson software. The software architecture is designed to communicate electronic data seamlessly,” says Chris Wessells, Director of Business IT Solutions at TetriDyn.

This new product offering is in addition to TetriDyn’s own Electronic Medical Record offering – AeroMD. AeroMD was specifically designed for use in small medical practices. TetriDyn is also a certified VAR of McKesson’s Medisoft patient management software. TetriDyn is pleased to offer products to a wider segment of the medical industry.
